EDUCATION

Michigan State University

B.S. in Computer Science, Minor in Business

East Lansing, MI

Aug. 2024 – May 2028

- **Courses:** Data Structures & Algorithms (CSE 331), Discrete Structures (CSE 260), Linear Algebra (MTH 314), Probability & Statistics (STT 351), Object-Oriented Programming (CSE 232)

EXPERIENCE

Software Engineering Intern

June 2025 – August 2025

Digeon Technologies LLC

Canton, MI

- Developed 20+ RESTful API endpoints in a Dockerized Flask microservices architecture deployed on AWS EC2/RDS, supporting authentication, marketplace listings, and subscription workflows
- Containerized 5 core services using Docker & Caddy reverse proxy, reducing environment-related deployment issues by 40% and improving release consistency
- Integrated Stripe subscription billing and payment validation, enabling recurring transactions and secure lifecycle management for paid AI tools

Student Security Analyst

Nov, 2024 – June 2025

Michigan State University

East Lansing, MI

- Automated hardening of 12+ Linux and Windows servers using Bash, remediating 8+ critical vulnerabilities (misconfigurations, privilege escalation vectors) and reducing attack surface exposure in simulated enterprise environments
- Configured and deployed 5+ Splunk SIEM detection rules, improving simulated incident detection accuracy by 60% and strengthening alert triage workflows
- Conducted 10+ penetration testing simulations using Kali Linux and Metasploit, performing enumeration, exploitation, and post-exploitation analysis with full mitigation validation

PROJECTS

Bodybuilding Coach AI

- Built a full-stack hypertrophy coaching platform with a RESTful FastAPI backend and Next.js frontend
- Engineered a deterministic rule-based scoring engine (HEI) to evaluate stimulus, progression, and recovery per muscle group
- Implemented automated training volume (± 2 sets, capped at 16) and caloric adjustments (± 150 –250 kcal) with hard physiological constraints
- Designed normalized PostgreSQL schema and JWT-based authentication to support structured weekly check-ins and decision workflows

Tools Directory AI

- Built an AI tools discovery platform using Flask and MySQL, supporting search, filtering, and evaluation across 200+ indexed agents
- Optimized database queries and client-side filtering logic, reducing search latency by 20% and improving UI responsiveness

VSI Threat Watch

- Built a Splunk-based monitoring pipeline analyzing Windows and Apache logs, improving threat visibility by 80% and detecting 100% of injected attacks via real-time anomaly alerts
- Performed log forensics and deployed MFA/WAF-driven remediation strategies, reducing detection time by 30% and strengthening defenses by 40%

TECHNICAL SKILLS

Languages: Python, C++, C, Java, JavaScript, SQL

Frameworks & Backend: FastAPI, Flask, Django, React, SQLAlchemy

Databases: PostgreSQL, MySQL

Cloud & Devops: AWS (EC2, RDS, VPC, CloudWatch), Docker (Compose), Git

System & Security: Linux, System Hardening (SSH, PAM), Splunk

Awards: Eagle Scout, Dean's List Award
