Education

Michigan State University East Lansing, MI

Bachelor of Science in Computer Science *Expected May 2028*

- **Relevant Coursework:** Software Engineering, Database Systems & Cloud Computing, Data Structures & Algorithms, Computer Systems, Computer Architecture, Discrete Mathematics, Linear Algebra

Experience

Morsby, Gorman, McCarthy LLC – Project Guardian July 2026 – Present

Systems Engineering & Automation Intern *Remote*

- Developed **Python and JavaScript automation** to validate data across **13 Excel source-data and QA worksheets**, verify KPI calculations and source traceability, and streamline documentation and final deliverable checks.
- Engineered a **Tableau analytics dashboard** integrating **3 national connectivity KPIs** and a **31.6-percentage-point urban-rural adoption gap**, translating verified public data into reproducible, policy-focused insights.

Emergtech Business Solutions Inc. June 2026 – Sept. 2026

Software Engineering Intern *Farmington Hills, MI*

- Engineered **AWS Bedrock AI pipelines** converting brainstorming discussions into prioritized action items for **150+ users across 12 organizations**, reducing hallucination and retrieval error rates from **12% to under 2%**.
- Optimized LLM inference using **SHA-256 caching, request deduplication, and token tracking**, reducing average end-to-end response latency by **54% (2.4s to 1.1s)** and inference costs by **65% per 1,000 requests**.
- Developed **25 backend routes and 14 MongoDB models** for multi-tenant SaaS workspaces, integrating **OAuth 2.0 and Jira webhooks** for bidirectional task synchronization, validated with **52 passing automated tests**.

Digeon Technologies LLC June 2025 – Dec. 2025

Software Engineering Intern *Canton, MI*

- Engineered an AI marketplace using **Flask, React, SQLAlchemy, and MySQL** across **5 microservices**, supporting **304 registered users, 200+ AI agents, and 127 completed sales** through Stripe-powered transactions.
- Optimized **Flask APIs and Dockerized AWS EC2/RDS infrastructure**, leveraging **Amazon S3** for object storage to reduce p95 API latency by **45% (850ms to 460ms)** and handle **2.5× higher concurrent request volume**.
- Built a **GitHub Actions CI/CD pipeline** for **3 developers**, automating app and database deployments, cutting deployment time by **35%** and pipeline execution by **50%**, while scaling releases from **4 to 16+ per month** with zero deployment downtime.

Projects

Algorithmic Trading & Market Intelligence Systems | *Python, FastAPI, PostgreSQL, WebSockets, Alpaca, Docker*

- Engineered a **real-time Solana analytics pipeline** using FastAPI, PostgreSQL, and Geyser/WebSocket subscriptions, processing **180,000+ blockchain events daily** across **4,500+ tokens/pools**; reduced p95 ingestion latency by **60% (300ms to 120ms)** while sustaining **350 events/sec** at peak.
- Developed an **ML-driven equities paper-trading system** integrating Python, Alpaca APIs, and PostgreSQL to analyze **150 NASDAQ stocks per run**, automating **2,400 strategy evaluations** and executing **84 simulated paper trades** over 30 days through scheduled GitHub Actions workflows.

Success Society | *Next.js, TypeScript, Supabase, Stripe, AI*

- Engineered a **full-stack SaaS platform** using Next.js, TypeScript, Supabase, and Stripe, supporting **160 active paying members** and generating **$2,400 in monthly recurring revenue** through subscription billing, authentication, and role-based dashboards.
- Built an **AI-powered lead generation pipeline** discovering **4,200+ businesses monthly** and dispatching **450 personalized outreach emails weekly**, accelerating lead qualification by **75%** and eliminating **14 hours of manual work per week**.

The Pickle Nest | *Next.js, TypeScript, PostgreSQL, Prisma, Google Places API*

- Architected a **full-stack venue discovery and booking platform** with **49 REST API endpoints and 22 PostgreSQL models**, indexing **14,500+ pickleball venues across 50 states** and supporting **110+ active users** through geospatial search and booking workflows.
- Optimized **PostgreSQL geo-search and Google Places API ingestion**, reducing p95 search latency by **78% (950ms to 210ms)** while handling **2,500 daily API requests**, accelerating nationwide seeding by **65%** and eliminating **98% of duplicate listings**.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, C/C++, Rust, HTML/CSS
AI & Backend: AI/LLMs, AWS Bedrock, FastAPI, Flask, Node.js, Express.js, REST APIs, WebSockets
Data & Storage: PostgreSQL, MySQL, MongoDB, Redis, Prisma, SQLAlchemy
Cloud & DevOps: AWS (EC2, RDS, S3, CloudWatch), Docker, GitHub Actions, CI/CD, Git, Linux/Unix
Frameworks & Tools: Next.js, React.js, Supabase, Tableau, OAuth, Stripe, Microservices
Awards & Certifications: **Eagle Scout**, MSU Cybersecurity Bootcamp
